

Machinery Company

The Machinery Company will accelerate the enhancement of a stable earnings platform through the accumulation of superior assets as well as the discovery and buildup of a future earnings platform.

CSR at the Machinery Company

Contributing to the prosperity of local communities and the international society through environment-friendly businesses

We strive to develop and expand sales related to environment-friendly businesses and products that help reduce environmental impacts. We will also endeavor to further the realization of a society that is in harmony with the environment and contribute to the prosperity of local communities and the international society.

CSR Action Plans: Key points of our fiscal 2013 action plans

In this fiscal year, continuing to conduct management in consideration of environmental and CSR issues, we will aggressively work on businesses related to renewable energies including biomass, geothermal, and wind power, as well as those related to water, placing a specific focus on desalination plants.

For details, please visit the following website:

Business Areas

Plant Project, Marine & Aerospace Division

This division is involved in large-scale projects in such areas as oil, gas, petrochemicals, and electric power generation; projects in social and transportation infrastructure, such as railways, roads, bridges, and ports; aircraft and aircraft equipment-related area; and dealing all types of new ships, secondhand ships, and chartered ships. The division is also active in the water- and environment-related area, such as seawater desalination plants and energy-from-waste power generation, as well as in the renewable-energy area, including power generation from geothermal energy, wind power, and biomass.

Automobile, Construction Machinery & Industrial Systems Division

This division advances sales and business development for passenger cars, commercial vehicles, and construction machinery in domestic and international markets as well as sales of electronic system equipment, industrial machinery, semiconductor equipment, and rechargeable battery-related equipment/products/various materials. In addition, the division is also active in the medical/health-related area, particularly in medical devices, medical supplies, and services for hospitals.

Contributing to Society and the Environment through Our Businesses

World's Largest Wind Farm Goes into Operation

The Shepherds Flat Wind Project (845 megawatts), in which we participate through U.S. subsidiary Tyr Energy, began commercial operation in stages from February 2012.

Once complete, Shepherds Flat will be the world's largest wind farm. The project will generate enough energy to supply over 235,000 average U.S. homes, and will achieve a reduction of about 1.5 million tons of CO₂ per year, equivalent to the annual amount of CO₂ from approximately 200,000 passenger vehicles.

The project is the second project implemented under a memorandum on business collaboration concerning co-investment in renewable energy worldwide, concluded between ITOCHU and the General Electric Company.

Supporting Disaster Control by Supplying Medical Equipment

Japan Medical Partners, for which ITOCHU is the leading member, is a non-profit organization consisting of private companies. It helps ensure the continued provision of medical services at times of disaster and supports local municipalities in educational activities and operations involving countermeasures against infectious diseases and disasters.

We create "products and services," "information," and "operational knowhow" by combining and merging the functions of member companies of Japan Medical Partners. By providing them, we spread the correct knowledge about disasters daily, help take related initiatives, and help ensure the continued provision of medical services in the event of disaster.
