Organization

Composition by Segment (image)
Industrial materials: approx. 20%
Brand: approx. 40%
Apparel: approx. 40%

Percentage of Earnings from Overseas Businesses (image)
Overseas: approx. 30%
**Analysis of Current Status**

### Strengths

- Strong position as the unmistakable leader among general trading companies in the textile industry
- Full-spectrum value chain that includes everything from upstream to downstream operations in the textile industry
- Highly efficient business foundation and a balanced asset portfolio

### Earnings Opportunities

- Changing consumer trends in the Japanese market such as increasing inbound tourism
- Growth of consumer markets in China and other parts of Asia due to rising standards of living
- Trade agreements that can lead to new commercial opportunities
- Creating a stable structure for manufacturing by developing a supply chain that values human rights and achieves improvements in the working environment
- Meeting new consumer demand for sustainable and ethical practices by creating environmentally friendly businesses, such as those using recycled textiles

### Challenges to Address

- Encouraging consumption through the creation of new ways to add value for consumers under the shrinking domestic apparel market
- Cultivating overseas markets with influential partners under a decreasing domestic population
- Improve the precision of supply chain management and conduct more in-depth and broader initiatives
- Ensure business sustainability by responding swiftly and positively to environmental legislation

### Asset Portfolio

**Industrial materials**

- Raw materials, garment materials, apparel

**Brand business**

**Growth potential**

**Asset scale**

EXIT from “stable earnings” in FYE 2016: Shanshan Group

**Value driver**

**Stable earnings**

**Reinforce**

### Growth Strategies

- Increase earnings by enhancing existing businesses through cultivation and improvement
- Expand new trade and initiatives in growth fields, such as e-commerce, sports, etc.
- Increase fundamental earnings by enhancing existing businesses through measures, such as promoting a lean and streamlined management
- Further promote the expansion and replacement of superior assets while maintaining a mid- to long-term perspective
- Strengthen capital initiatives by partnering with strong local companies in Japan, China, and other parts of Asia
In addition to new initiatives and projects, the Textile Company aims to achieve stable and sustainable growth in the mid to long term by further strengthening its existing businesses.

ITOCHU holds the trademark rights for the Converse brand in Japan. We obtained the rights for use in apparel and accessories in 1999, followed by shoes in 2001. In 2002, we established Converse Japan Co., Ltd., as a wholly owned subsidiary. Since then, the Textile Company has made a unified effort to strengthen and grow the brand, further enhancing its value in the Japanese market. To increase sales channels and continue to build on the core wholesale business of Converse shoes, in 2015 we opened the brands’ first directly operated store. The business continues to evolve steadily as we look to further expansion through new initiatives such as high-end collaborations with prominent designers to promote the brand’s development. Furthermore, the brand’s apparel initiatives were previously focused on the sale of mid-range products to mass retailers, but recently we have started a new partnership with MELROSE CO., LTD., which is a strong player in the apparel industry that develops and operates brands in Japan. This partnership has resulted in the launch of a high-end apparel line and has significantly boosted the brand image in non-shoe categories.

The success and growth of the Converse brand is a prime example of how we will continue to pursue new initiatives to strengthen and grow our existing businesses.

SANKEI CO., LTD. is an ITOCHU subsidiary that specializes in garment materials and notions, such as linings, buttons, and fasteners. SANKEI is known as a total supplier, providing comprehensive services that include production, sales, and distribution in both Japan and international markets. SANKEI’s Mikuni factory in Fukui Prefecture specializes in the dyeing of lining materials and is the largest of its kind in Japan. Through this and several other factories, SANKEI holds a 70% share of the domestic market. In recent years, the company has also focused on development in cutting-edge fields, including the manufacture and sale of contactless IC tags (RFID). Through its proactive engagement in these fields, SANKEI is working to foster the early adoption of this technology in both Japan and overseas.

Since SANKEI became a subsidiary in 2008, ITOCHU has worked to support the business by dispatching management resources to SANKEI in an effort to bring about structural reforms and the growth of its apparel functions. As a result, the company has achieved a solid position as the industry leader in garment materials and notions. We also proactively promote synergies within the Group, including SANKEI’s provision of garment materials to EDWIN, which is one of the largest denim manufacturers and distributors in Japan.

From an ESG perspective, SANKEI is working to achieve cost reductions and implement environmental measures, such as installing solar power panels on some of their unused land and building a biomass boiler fueled by waste wood chips. Through these initiatives, the company is striving to establish a sustainable manufacturing foundation and shrink its environmental footprint by reducing CO₂ emissions and converting to natural energy.

Please see the Sustainability pages of our website to learn more about our initiatives targeting sustainable growth issues.

### Analysis of Current Status

#### Strengths
- Solid business relationships with excellent partners in each field of operations
- Broad-based business development on a global scale in the automobile sector
- Diverse businesses in advanced countries and business developments in emerging countries that minimize country risk

#### Earnings Opportunities
- Numerous investment opportunities to meet growing demand for global infrastructure (electric power, water, environmental, transport, and energy)
- Market expansion due to rising automobile demand in emerging countries
- Growing needs for leading-edge medical devices in advanced countries as their societies age
- Participation in renewable energy projects, including geothermal and wind power generation
- Initiatives in water-related businesses in response to increasing demand for water

#### Challenges to Address
- Trade and business development that takes into consideration the pace of growth and country risk in emerging countries
- In infrastructure-related businesses, consideration for environmental protection, local communities, and human rights in development regions
- In medical businesses, response to the rapid aging of society
- Response to a low-carbon society by utilization of renewable energy

### Asset Portfolio

#### Asset Strategies
- Replace assets and accumulate superior assets
- Invest in projects while paying due consideration to environmental protection and local communities

#### Creating Added Value
- Augment ability to generate fundamental earnings through measures to enhance existing businesses
- Boost trade and reorganize and strengthen the value chain business, expanding into peripheral fields
- Promote cooperation with excellent partners (such as the CITIC Group and the CP Group)
- Promote the construction of a medical device value chain

### Growth Strategies

#### Materialities
- Consideration for the environment
- Sustainable use of resources
- Respect and consideration for human rights
- Contribution to local communities
- Improving labor conditions

#### Business Portfolio

- Plant / Power projects
- Construction machinery / Industrial machinery / Medical devices
- Marine / Aerospace
- Automobile

#### Asset scale
- Value driver
- Stable earnings
- Reinforce
YANASE & CO., LTD., is the largest imported car dealership group in Japan, with a network of approximately 190 locations around Japan and some 4,700 employees. The company marked its 100th anniversary of establishment in 2015. YANASE currently handles seven automobile brands centered on Mercedes-Benz, with sales of approximately 43,000 units per year, which is 15% share of the imported car market in Japan.

ITOCHU became a capital participant in YANASE in 2003. Since then, we have gradually increased our capital contribution ratio, and in the second quarter of FYE 2018 we converted the company to a consolidated subsidiary. ITOCHU is following the investment policy that prioritizes investment in carefully selected projects, centering on additional investments of existing businesses with a proven track record to further enhance the quality and efficiency of its assets. YANASE is an example of these efforts.

Going forward, ITOCHU will strengthen its alliance with YANASE, and strive to enhance existing businesses in Japan, including new and used car sales and after-sales services. At the same time, we aim to improve YANASE’s corporate value further by realizing synergies with ITOCHU’s expertise, human and financial resources.

In Indonesia’s Sarulla region in North Sumatra, one of the world’s largest geothermal power projects (net capacity of 320.8 MW by three units) is under way by Sarulla Operations Ltd. (SOL), which was jointly established by ITOCHU Corporation, Kyushu Electric Power Co., Inc., INPEX Corporation, PT. Medco Power Indonesia, and Ormat Technologies, Inc. (USA).

In 2013, SOL signed a 30-year long-term power purchase agreement with Indonesia’s state-owned electricity company, and began the construction of a power plant and steam field drilling, of which commercial operation of the first unit commenced on March 18, 2017. With ongoing construction, the second unit is set to achieve commercial operation in 2017, followed by the third in 2018.

Indonesia stands out as the home of one of the world’s largest geothermal reserves and the Indonesian government is aggressively promoting its development as a strategic source of electricity. Amid growing infrastructure demand around the world, ITOCHU continues to promote investments in business opportunities which make contributions to the economic development of emerging countries with due consideration paid to environmental protection and local communities.

Mineral Resources:
Total assets (outside): approx. 70%
Consolidated net profit (inside): approx. 70%

Percentage of Earnings from Overseas Businesses (image)

Overseas: approx. 80%
### Analysis of Current Status

#### Strengths
- Strong relationships with excellent business partners in each business area
- Ownership of superior natural resource assets, centering on iron ore and coal
- Broad-ranging trade flows that run from upstream (metals and mineral resources) to downstream (steel and non-ferrous products)

#### Earnings Opportunities
- Long-term demand growth for metals, mineral resources, and energy
- Expansion of trade and creation of supply chain based on equity interests
- Improvement of ongoing business and new business development with excellent partners
- Proliferation and gain in momentum of solar and other types of renewable energy
- Progress in the biomass power generation business and expansion of the market for biomass fuels

#### Challenges to Address
- Establishment of a well-balanced and stable earnings platform resilient to business environment changes
- Improvement in production efficiency at each project to be more resistant to fluctuations in resource prices
- Acquisition of superior interests to secure stable supply of metals and mineral resources
- Sustainable resource development with consideration for local communities, working environments, and the environment
- Thorough enactment and ongoing monitoring of supply chain management

### Asset Portfolio

#### Asset Strategies
- Expand the asset portfolio through collaboration with excellent partners and by acquiring superior new projects
- Promote the replacement of low-efficiency assets

#### Growth Strategies
- Expand business through collaboration with excellent partners and by reinforcing the sales and trading functions
- Proactively develop the environmental business (mega-solar projects, trading in biomass fuels, etc.)

### Materialities
- Consideration for the environment
- Sustainable use of resources
- Respect and consideration for human rights
- Contribution to local communities
- Improving labor conditions

### Growth Potential

- Environment-related
- Steel-related
- Trade in products, resources, and fuel
- Development of metals and mineral resources

### Exit from "reinforce" in FYE 2016: NCA equity interest

- Value driver
- Stable earnings
- Reinforce
Promoting Sustainable Resource Businesses

The Metals & Minerals Company holds resource interests in regions throughout the world, centering on iron ore and coal. Principal interest groups include iron ore in Western Australia, coal in Eastern Australia, iron ore in Brazil, and coal in Colombia.

Working with leading resource companies and other excellent partners, we pursue our mission of providing a stable supply of high-quality resources to customers by honing the competitiveness of our equity interests while giving due consideration and contributing to environmental protection and community development, and at the same time leveraging our trading function. Notably, in Western Australia we have been working with leading resource company BHP Billiton since the 1960s on the development and operation of iron ore projects that are some of the world’s most competitive. In Eastern Australia, we are engaged in a broad range of coal projects, ranging from high-quality thermal coal to coking coal, mainly with Glencore.

Going forward, while continuing to maintain a certain level of assets in the resource field we will configure a portfolio that is well-balanced across the Company. Aiming for further development, we aim to work with excellent partners around the world to obtain high-quality assets and expand our trading function.

Preventing global warming, and realizing a low-carbon society to this end, are among the world’s most important priorities. In Japan and overseas, efforts are under way to introduce and promote the spread of solar power, biomass, and other types of renewable energy, and renewable energy markets are expected to steadily expand as a result.

ITOCHU’s roles in the renewable energy business include developing and operating projects, procuring materials, and supplying fuels.

In addition to the Saijo Komatsu Solar Power Plant (Ehime Prefecture, output of 26,200 kW) and the Oita Hiyoshibaru Mega-Solar Power Plant (output of 44,800 kW), January 2017 marked the start of commercial operations at the Shin-Okayama Solar Power Plant. This plant has an output of 37,000 kW, which is sufficient to meet the annual consumption of approximately 7,600 households and is expected to reduce CO₂ emissions corresponding to some 26,000 tons per year. Construction is also under way at a plant in Saga Prefecture. We plan to continue with our proactive efforts to develop renewable energy generation and related trading businesses in Japan and overseas.

Please see the Sustainability pages of our website to learn more about our initiatives targeting sustainable growth issues.

Energy & Chemicals Company

We aim to maintain and expand our ability to generate earnings base by enhancing existing businesses in Japan. At the same time, we will take strategic actions in new business fields worldwide to strengthen our business foundation over the medium to long term.

Analysis of Current Status

Strengths

- Business portfolio in the energy sector ranging from upstream to downstream
- Worldwide sales network of chemicals trading
- Robust portfolio of chemicals projects ranging from upstream to downstream

Earnings Opportunities

- Long-term growth in energy demand
- Robust expansion in chemicals demand in China, ASEAN, and North / Central / South America
- Rising food demand in line with a growing world population (methionine, fertilizers, etc.)
- Needs for environment-friendly energy and products

Challenges to Address

- Establishment of a well-balanced and stable earnings platform resilient to business environment changes
- Promotion of cost-competitive energy development projects with prime partners
- Strengthening the compliance system for changing chemical-related legislations
- Energy development with consideration for local communities, working environments, and the environment

Asset Portfolio

Growth Strategies

- Bolster earnings base in existing businesses and expand business foundations in new fields
- Realize synergy and integration effects of C.I. TAKIRON, which has become a leading Japanese plastics processing company
- Promote collaboration with prime partners, including the CITIC Group and the CP Group and oil majors

- Build up additional superior assets of oil and gas development and LNG projects
- Expand the chemicals trade network and ensure lean management and low-cost operations
Methionine Business with Sumitomo Chemical

In December 2016, ITOCHU signed a basic agreement with Sumitomo Chemical Co., Ltd., to collaborate in the sales of the feed additive methionine to be produced on a new production line of Sumitomo Chemical's Ehime Works (100,000 tons per year). After a formal agreement was concluded in March 2017, we began pre-marketing in April 2017 with a view to commence full-fledged sales collaboration once the new production line is complete.

Methionine, an amino acid, is widely used to boost chicken meat and egg productivity. Adding methionine also helps to adjust the amino acid balance in feed, promoting the efficient use of amino acids within an animal's body, which reduces the amount of nitrogen oxide in excrement—a positive environmental result.

Global demand growth for methionine is forecast to be stable. ITOCHU has built up a strong relationship with the Charoen Pokphand Group, a leading consumer of methionine, and has a global sales network.

Through this basic agreement, ITOCHU and Sumitomo Chemical will seek to integrate the strengths both companies have cultivated over the years in China and other Asian markets. By working together to further enhance our business in global markets, we aim to contribute to a stable supply of food throughout the world.

Oil Exploration, Development, and Production Activities in Eastern Siberia, Russian Federation

Together with Japan Oil, Gas and Metals National Corporation and INPEX CORPORATION, ITOCHU is participating in oil exploration, development, and production activities in Irkutsk Oblast, Eastern Siberia, Russian Federation. These activities are being conducted through Japan South Sakha Oil Co., Ltd. (JASSOC). The operator for this project is INK-Zapad, a joint venture between Irktusk Oil Company (INK) and JASSOC. INK-Zapad has moved forward with exploration and appraisal operations. Crude oil reserves sufficient for commercial production were confirmed at the Ichyodinskoye (ICH) oil field, and the field was moved to the production phase in December 2016.

The crude oil produced at this field will not only be supplied to the domestic market in Russia but also exported to the Asian market, including Japan. Further discoveries of large-scale oil and gas fields are anticipated in Eastern Siberia. In addition to the ICH field, other oil and gas accumulations have also been confirmed in the blocks. Going forward, the project will continue to focus on business expansion. Resource projects are depleting assets, and there is a continuing need for asset augmentation. Accordingly, ITOCHU will continue working to acquire superior projects that contribute to the establishment of a stable earnings base.

**Food Company**

Commerce is not just about selling products. Rather, it requires constant vigilance toward product sales. By giving thoughtful consideration to downstream operations, we are further strengthening our value chain spanning upstream to downstream activities as we work to augment corporate value, including our Group companies.

- Improving labor conditions

Asset Portfolio

Creating Added Value
- Expand peripheral businesses with FamilyMart UNY Holdings in areas including finance, IT, distribution, and services
- Increase scale of the Dole business
- Reinforce the ITOCHU Group’s value chain
- Promote collaboration with excellent partners (such as the CITIC Group and the CP Group)

Asset Strategies
- Strengthen relations with existing businesses
- Spearhead industry reorganization
- Accelerate efficiency in management
Initiatives to Enhance Corporate Value

Turning Around the Dole Business

In April 2013, we acquired the Asian fresh produce business and the worldwide packaged food business from Dole Food Company, Inc. Following the acquisition, the Philippines—the largest production hub for the business’ mainstay products—was affected by typhoons, droughts, and pest damage, causing banana production to fall by around 40% from the time of purchase. We are working to recover and expand production levels by leveraging our funding capabilities, including the Group finance system, and dispatching managers and onsite workers. Specific measures include the introduction of irrigation equipment, consolidation and expansion of farms, measures to combat pests for bananas, and capital investment in plantations and the revision of cultivation methods for pineapples. Furthermore, we promoted the diversification of producing areas to minimize climate risk. We have also improved management, including the selection and concentration of businesses and products and the liquidation of unprofitable businesses.

In FYE 2017, favorable selling prices and the success of various cost-reduction measures led to a recovery in earnings. By FYE 2021, we plan to increase production in the Philippines to 800,000 tons of bananas, up from 400,000 tons in FYE 2016, and 1 million tons of pineapples, up from 750,000 tons, becoming Asia’s largest integrator of agricultural products.

Synergies with Prima Meat Packers

Prima Meat Packers, Ltd., which is an associated company of ITOCHU, processes and sells ham, sausage, and other meats.

To reinforce production capabilities in its mainstay ham and sausage business, in 2016 Prima Meat Packers completed construction and began operations at a new sausage plant within its Ibaraki Plant. In the meat business, Prima Meat Packers has jointly developed a pork brand with HyLife Group Holdings, which is also an associated company of ITOCHU. HyLife is Canada’s leading pork producer and accounts for the highest sales volume of Canadian chilled pork imported to Japan. By offering HyLife’s unique product varieties and mixing its own feed, Prima Meat Packers is working to expand its pork sales on the strength of its reputation for safety and quality. In addition to HyLife, we plan to further reinforce the value chain throughout the ITOCHU Group.

Through human resource exchanges, such as seconding personnel to sales and staffing departments, ITOCHU is seeking to strengthen mutual understanding between the companies. In this manner, we are working actively to generate synergies that will contribute to Prima Meat Packers’ medium- to long-term growth and further increasing their corporate value.

Please see the Sustainability pages of our website to learn more about our initiatives targeting sustainable growth issues.

**Analysis of Current Status**

**Strengths**
- Firm position and value chains in each business area
- Creation of synergy through collaboration between businesses
- Strengthening of the management foundation through the aggressive replacement of our asset portfolio

**Earnings Opportunities**
- Market expansion due to rising living standards of people in China and the ASEAN region
- Rise in demand for specialized and sophisticated logistics infrastructure services
- Create earnings opportunities in the building materials business in Japan and overseas

- Demand for environmentally conscious products and construction materials
- Need for certified forestry products

**Challenges to Address**
- Hedging of market price fluctuation risk on commodity products (pulp, natural rubber, etc.) and housing
- Response to changing market needs and regulation in various fields
- Sustainable use of resources
- Harmony with local communities

**Materialities**

**Growth Strategies**

**Creating Added Value**
- Increase profitability in the European tire business
- Expand the earnings platform in the domestic and overseas building materials business
- Augment the logistics facility development business
- Reinforce the operating platform for international logistics, centered on China

**Asset Strategies**
- Accumulate superior assets, focusing on existing businesses
- Continue promoting the asset turnover model in the real estate field
Initiatives to Enhance Corporate Value

Creating Added Value

Strengthening and Expanding Logistics Services for Internet Sales in China

ITOCHU LOGISTICS CORP. is the core logistics company for the ITOCHU Group, spearheading its overseas logistics operations. ITOCHU LOGISTICS (CHINA) CO., LTD., is building logistics networks in China. Early on, the company commenced initiatives targeting the market for Internet sales in China, which is expected to continue growing at a stable rate of 10% or more each year, and has developed distribution services covering all sales channels integrated with online and actual stores. ITOCHU LOGISTICS offers a fulfillment service that covers all functions related to Internet sales, including call center operations and marketing.

With a warehouse network currently spanning more than 100 locations throughout China, ITOCHU LOGISTICS (CHINA) operates large-scale logistics centers dedicated to Internet sales in major Chinese cities and is building some of the largest-scale logistics networks for Japanese companies operating in the country, shipping 20 million orders per year to meet demand in China’s rapidly growing market for Internet sales.

Leveraging our expertise as a general trading company, we plan to reinforce our unique functions, including the integrated development of the omnichannel, online-to-offline (O2O), and commercial product businesses, contributing to customers’ Internet sales business and working to expand our overseas logistics business.

Initiatives at METSA FIBRE

Creating Added Value

Amid rising global demand for paper, METSA FIBRE Oy, an ITOCHU affiliate and one of Finland’s largest producers of softwood pulp, is taking advantage of the country’s sustainable forestry resources to provide a stable supply of raw materials in a highly cost-competitive manner.

In the 1970s, ITOCHU and METSA FIBRE began working together to import products to Japan. We entered a formal sales alliance in 2004 and currently market the company’s softwood pulp in the Asian market as an exclusive agent. As METSA FIBRE has decided to ramp up annual production by a substantial 800,000 tons, annual pulp production is expected to reach 3.1 million tons in 2018. This increase is slated to make METSA FIBRE the world’s leading producer of softwood pulp for paper.

From an ESG perspective, METSA FIBRE generates electricity during the pulp production process, using some of the energy itself and providing the surplus to the surrounding community, which helps to reduce fossil fuel consumption in the area. By working with this excellent partner, ITOCHU believes it is both promoting the sustainable use of forestry resources and engaging in important measures to foster harmony with local communities.

Please see the Sustainability pages of our website to learn more about our initiatives targeting sustainable growth issues.

Analysis of Current Status

**Strengths**
- Solid position of strong Group companies in the ICT field and the generation of synergies through alliances between businesses
- Business development in the retail financial services and insurance fields in Japan and overseas
- Network including startups and other leading-edge companies in Japan and overseas

**Earnings Opportunities**
- Creation and expansion of finance-related business opportunities connecting Japan and the rest of the world
- Initiatives in fintech and other new markets combining ICT and finance
- Expansion of the infrastructure services business in response to increasingly specialized and sophisticated business processes
- Improved business efficiency and higher productivity through the use of AI and IoT
- Cultivation and business development support for excellent companies in regional Japanese locations

**Challenges to Address**
- Further advances in customer-response quality and efficiency in consumer business
- Provision of business solutions to address increasingly complex and sophisticated changes in the ICT business environment
- Responding to the fast-changing business environment and regulations in various sectors
- Thorough information management in the ICT, healthcare, and financial businesses

Growth Strategies

**Creating Added Value**
- Bolster fundamental earnings capacity by executing growth strategies at key Group companies, such as CTC and CONEXIO
- Through venture investments, cultivate businesses that will generate new earnings in the fintech, AI, and IoT fields
- Strengthen and expand initiatives with FamilyMart UNY Holdings in the ICT and finance fields

**Asset Strategies**
- Diversify our portfolio by accumulating prime assets
- Maintain relatively high levels of ROA through efficient asset deployment
- Make proactive venture investments and replace assets
Initiatives to Enhance Corporate Value

Sustainable Growth Model in First Response Finance

Through an overseas subsidiary, ITOCHU is a 100% shareholder in First Response Finance Ltd. (FRF), which operates a second-hand car loan business. We support FRF in such ways as dispatching a management team and providing funding. With a corporate philosophy of “people, service, and profit,” FRF considers its human resource strategy is the key to sustainable growth. In line with this philosophy, the company is fully committed to recruiting and cultivating human resources from a long-term perspective, as well as to fostering a corporate culture of sincerity and openness to achieve a favorable working environment.

Thanks to the resulting increase in employee motivation and the provision of high-quality services, FRF has established a sustainable growth model that has generated record earnings over nine consecutive years. In recognition of FRF’s achievements, The Sunday Times, a major UK newspaper, has selected FRF for its “100 Best Companies to Work For Awards” for seven consecutive years.

In addition to FRF, ITOCHU also contributes to the development of local communities by building financial businesses that meet customers’ financial needs in Asia, where the middle income group is growing.

Taking On New Business Domains by Leveraging AI and Fintech

ITOCHU continues to take on challenges in new business domains through its fusion of ICT, which excels in deploying new technologies and business models, and the financial services and insurance business, whose forte lies in the retail business. We are focusing in particular on the fields of fintech (finance + technology) and artificial intelligence (AI), as we proactively promote venture investments in Japan and overseas.

In FYE 2017, ITOCHU entered a capital alliance with MYDC, which operates and administers individual-type defined contribution pension plans (iDeCo). We also formed a capital alliance with Exchange Corporation, which uses AI to provide an asset investment proposal service and offers the Paidy online settlement service, entering a personal finance and cardless settlement business based on credit scoring. In the business process outsourcing (BPO) field, ITOCHU, BELLSYSTEM24 Holdings, and NTT DATA entered a capital alliance with SOLAIRO, which uses AI technology to provide a Web-based customer interaction service.

In 2017, we established the new Fintech Development Section within the ICT & Financial Business Company. This office will take the lead in the creation of advanced financial services that leverage technology and entry into new markets by combining the ICT Division’s business development functions with the customer network and expertise of the Financial & Insurance Business Division.
