SUSTAINABLE TRIVIA

Bits of knowledge about sustainability

Tableware

Second-hand commercial tableware is mainly used. We carefully select those potential from miscellaneous items, re-design and use them effectively while concerning of reduction on environmental burden.

Uniform

Dry cotton shirt from "BRING" is used as our uniform. "BRING" is a company which are implementing the circular economy in society by collecting clothes no longer in use, regenerating into raw clothing materials by their own technologies, and making clothes to clothes over and over again.

Interior

Tables and chairs are not made from new floor materials but used boards in construction sites. Although dirt, scratches, nails and paints remain, these marks give interiors an old-fashioned taste which cannot be shown on those new.

Herb Garden

"Root Pouch", non-woven plant pot made from recycled plastic bottles and natural materials is used. It is well breathable, water-permeable, light and easy to move with a handle; a perfect plant-friendly and earth-friendly plant pot for balcony or rooftop gardening.

Food Loss

We are tackling recycle activities on organic wastes, such as making hand soap by resourcing waste oil from restaurant, regenerating biogas which is recycled from food waste into fuels for power generation, etc..
